Inground Pool Closing Service Information

PRE-CLOSING REQUIREMENTS

1. Balance the pool water. We recommend you bring a sample to the store a day or two in advance of us closing your pool. This is very important to ensure the water chemistry is correct.
2. The pool must be fairly clean when arrive. We include a few minutes of dipping leaves/debris, however, if the pool needs more cleaning/vacuumping, add \$100 for up to an hour.
3. Set out the pool cover, water bags, winter plugs, etc. for us to easily access them.

WHAT'S INCLUDED

- We winterize the filter, pump, and the pool plumbing.
- We remove the skimmer basket(s), ladder(s), and handrail. (see disclaimer on page 2!)
- We install the pool cover.

ADDITIONAL RECOMMENDATIONS

We recommend adding winter chemicals and will add them at an additional cost, based on pool size.

POST-CLOSING RECOMMENDATIONS

Solid/Waterbag Covers:

Due to water and leaves collecting on top of the cover, you should periodically dip the leaves off and pump the excess water off the cover with a cover pump.

If you close your pool before October and plan to leave it closed through May, it is advisable to add Liquid Shock and Winter Algaecide once around Christmas. This will help to keep algae from growing. Pull the cover back on the corner of the deep end and pour the chemicals into the pool. Immediately brush the bottom of the pool a few times. This will help distribute the chemicals through the water.

Mesh Safety Covers:

If your pool doesn't have an overflow line, ensure that the water level doesn't get too high in the pool. Pumping some water out may be needed at times due to rain.

Add Liquid Shock and Winter Algaecide throughout the fall/winter (see chart below). Disconnect the cover on the corner of the deep end, pour the chemicals in, and brush the chemicals through the water. NEVER add chemicals through the cover because it could damage the cover.

Note: If you would like Rivers Pools to come by and add these chemicals for you for only \$55 per trip plus chemicals (within 20 miles of our store), please let us know. We will also help assure your water level is not getting too high in the pool. **Thank you for allowing Rivers Pools to be your professional winterization pool company.**

	Pools 10,000-22,000 gallons	Pools 23,000-30,000 gallons	Pools 31,000-45,000 gallons
October (Halloween)	1 gal shock & 16oz Polyquat60	2 gal shock & 32oz Polyquat60	3 gal shock & 48oz Polyquat60
November (Thanksgiving)	1 gal shock & 16oz Polyquat60	2 gal shock & 32oz Polyquat60	3 gal shock & 48oz Polyquat60
December (Christmas)	1 gal shock & 16oz Polyquat60	2 gal shock & 32oz Polyquat60	3 gal shock & 48oz Polyquat60
February (Valentines)	1 gal shock & 16oz Polyquat60	2 gal shock & 32oz Polyquat60	3 gal shock & 48oz Polyquat60
March (Easter)	1 gal shock & 16oz Polyquat60	2 gal shock & 32oz Polyquat60	3 gal shock & 48oz Polyquat60

Desired Closing Week: _____ **(a technician will call you to schedule)**

- Many times, with salt pools, the ladder gets calcified (welded) to the ladder anchor cups and it will not come out. We will make every effort to remove the ladder, but if it will not come out at the time of closing, it must be sawed-off in order to install the cover. In the spring, we can core drill out the old ladder cups and install new ones along with a new ladder. Ask us for more information or a quote if needed. By initialing, Initial: _____ you authorize Rivers Pools to saw off the ladder if necessary. If you DO NOT initial, you are acknowledging that a \$95 trip fee will be charged to your credit card and the pool closing will be canceled if the ladder will not come out and you do not authorize us to saw it off.
- Winter plugs/pool cover must be poolside prior to our arrival. Any needed winter plugs will be provided at an additional charge. Initial: _____
- Water bag covers: If any water bags are damaged and need replacing, or if there are not enough water bags, these will be provided at an additional charge. Initial: _____
- If the chlorine level is low at the time of closing or if pool is green, extra shock and/or algaecide will be added at an additional charge. Initial: _____
- If any new safety cover anchors are needed, these will be installed at a rate of: \$18 per anchor (up to 8 anchors) or \$15 per anchor (9 or more anchors). Initial: _____
