In-Ground Pool Opening Service Information

WHAT'S INCLUDED

We remove the mesh or solid cover, fold and bag it, and put it where you want to store it. We shock your pool. We de-winterize the filter, pump, and the pool plumbing. We install the skimmer basket(s), ladder(s), and handrail. We blow leaves and debris off your pool deck. We put in your pool sweep, if applicable. We will attempt to start up your pool heater, if applicable. Heaters that do not start will require a separate service call. Pumps that will not start or are seized up will require a separate service call as well. Any other equipment repairs will require a separate service call.

WHAT'S NOT INCLUDED

- Vacuuming
- Removing water and debris off pool cover (extra \$75 per hour)
- While we will install salt cells – we do not balance water salinity
- Balancing chemicals – We do shock the pool – But balancing chemicals are not included
- Cleaning/startup of slides, waterfalls, spas, etc are not included
- Any additional equipment repairs (pumps that will not start, leaks, etc.)
- Setting schedules in automation systems or dial timers.

POST-OPENING RECOMMENDATIONS

We recommend that the pool run for 24-48 hours prior to bringing a water sample to the store for computerized analysis. This will give the water time to fully circulate and give you a more accurate reading of your water chemistry. Therefore, our technicians will set the pool to run 24/7 unless requested otherwise.

After the initial 24-48 hours, we recommend bringing a water sample into the store monthly. We also offer weekly and bi-weekly pool maintenance. Please contact our store for further information: 770-262-8486.

I have read and understand this page. Initial: _____
